## Detailed Action

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 and 4 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Erickson.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

5. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Erickson in view of Bethard et al.

It would have been obvious to provide removable dividers in Erickson in view of the teaching in Bethard (elements 9, 3).

6. Claims 3 and 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Erickson in view of Tune.

It would have been obvious to provide a plurality of interchangeable sizing guides in view of the teaching in Tune (column 2, lines 29-30).

7. Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Erickson.

The exact number and arrangement of the apertures in Erickson would have been an obvious matter of design and/or choice since one arrangement would provide no unobvious result over another.

8. Claim 8 is rejected under 35 U.S.C. 103(a) as being unpatentable over Erickson in view of Tune as applied to claim 7 above, and further in view of Bethard et al as applied in paragraph 5 above.

9. Claim 6 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
